The strategic plan for starting the business:

- **Client acquisition strategy** (fast + scalable)
- **Revenue-sharing structure** – how to propose it
- **Marketing & branding roadmap**
- **Website + content system**
- **Monetization levers** (incl. partnerships, upsells, passive income ideas)

Here's a sneak peek of what your growth playbook will include:

- **Geo-targeted Instagram + Google campaigns** (Chennai-specific)
- **Wedding & bridal directory listings**
- **WhatsApp + Booking funnel system**
- **Website with portfolio + service packages**
- **Revenue share agreement** (more on that shortly!)

Registering the business makes everything more legit — especially for:

- Opening a business bank account
- Issuing invoices
- Running ads with a GST number
- Getting brand partnerships
- Making your revenue-sharing deal formal

Since she's just starting out, she can register it as a **sole proprietorship** or **one-person company (OPC)** to keep it simple. You both can upgrade to a private limited later if you scale.

Business Proposal

Hey Mrs.Vedha,

I'm really excited about what we're building together — your talent and portfolio are truly next level, and I know we can turn this into a high-demand brand with the right strategy.

As I continue investing time every day into branding, building the online presence, and generating leads, I'd love to propose a structured way to work together long-term.

Here's what I suggest:

- I'll continue doing the website, marketing, content, social, and brand development.
- You'll pay me an amount, for my work as not a fixed amount.
- On every client that comes in through my marketing or website/lead-generation, I receive 25% of the service amount.

I'm treating this as a serious growth role — not just technical help — and I'm committed to growing your brand across Chennai and beyond. Let me know your thoughts!
