

Zoom Meeting Manager

1. Create account at <https://zoom.us/signup>
2. Get your API Key and Secret by navigation to <https://marketplace.zoom.us/develop/create> and follow below screenshots how to create an account and give permissions.

Choose your app type

The screenshot displays the 'Choose your app type' interface on the Zoom App Marketplace. It features six selectable app types, each with a description and a 'Create' button. A red arrow highlights the 'Create' button for the 'OAuth' option.

App Type	Description	Action
JWT	Build an app that supports server-to-server integration with Zoom services without a need for user authorization. Generate your API Key & Secret.	Learn more Create
OAuth	Build an app that accesses user-authenticated data for use with third party applications. Generate your OAuth Client ID & Secret.	Learn more Create
Chatbot	Build a Zoom chatbot that gets installed in the Zoom Client and interacts with users via chat. Generate your Chatbot Client ID & Secret.	Learn more Create
SDK	Build mobile, desktop, progressive web apps, and hybrid apps that integrate Zoom Client functionalities. Generate your SDK Key & Secret.	Learn more Create
Webhook Only	Receive event-based notifications for Zoom account events such as meeting events, webinar events, cloud recording events, and more.	Learn more Create
Help me decide	If you are still not sure about which app type would best suit your needs, visit our documentation for details.	Help me decide

After you click Create on OAuth you will need to name your application and then chose User-managed app disable to publish the app on Zoom App Marketplace and click Create.

Create an OAuth app

App Name 9/50

Choose app type

☐ Account-level app
 This app must be installed by admin and can manage all users in the account

☒ User-managed app
 This app can be installed and managed by individual users

Would you like to publish this app on Zoom App Marketplace?
☐ By publishing to Marketplace, your app will be available for external users to install and use.

You will be redirected to App Credentials section. Copy your Client ID and Client Secret and insert them inside your CRM in **Settings->Zoom Meeting Manager**. After inserting the credentials you need to copy **Redirect URL** for OAuth from Zoom Settings and paste inside the input field on your Zoom App see below picture and also add your domain as whitelisted for your zoom application.

App Credentials

Below credential allows you to generate a token that is utilized by Zoom OAuth, providing you access to Zoom APIs.

Client ID

Client Secret

Redirect URL for OAuth
 Destination URL where Zoom will send the access token after the user completes the OAuth authentication.

 Copy from Settings->Zoom Meeting Manager

To use production credentials without publishing your app, please generate a [Publishable URL](#)

Whitelist URL
 Add URLs to be whitelisted for OAuth redirection to achieve improved security. Make sure to include either the entire or the prefix of the Redirect URL for OAuth.

[< Back](#) ✓ Saved

After you have successfully copied and pasted Client ID and Client Secret you will need to give you application permissions to work and communicate with your API from Zoom Meeting Manager. Click on Scopers and click Add Scopes to add application scopes / permissions.

MyZoomApp

Intent to publish: No | User managed app | OAuth app

Add Scopes

Scopes define the API methods this app is allowed to call, and thus which information and capabilities are available on Zoom. Scopes are restricted to specific resources like channels or files. If your app is submitted to Zoom, we will review your request for each scope. After your app is live, it will only be able to use permission scopes that Zoom approved.

Q Search name, ID, type

+ Add Scopes

< Back

✓ Saved

Continue

In the tabs **Meeting**, **Webinar**, **Recording** and **User** you need to check all permissions and click Done.

Add scopes

9 Added

Q Search the scope type

- Meeting
- Webinar
- Recording
- User
- Chat
- PAC
- Phone
- TSP

- ✓ View your meetings
meeting:read
- ✓ View and manage your meetings
meeting:write

Done

Describe how your app intends to use this particular scope

Now you are done and all set to go. Navigate in your CRM and click on Zoom Meetings in side sidebar menu. Now click **Login With Zoom** popup will be shown scroll down and click **Authorize**.
