

Quick Capital

Product Structure

Elavon Quick Capital, powered by Liberis, offers \$1,000 to \$500,000 in fast, flexible funding—without lengthy paperwork, wait times, or fixed monthly payments. Payments adjust to daily card transactions, with one fixed fee agreed upfront—no interest, no hidden costs.

Unique Selling Points

USP	Benefit	vs. Traditional Bank Loan
Quick & simple application process	The application is fast and doesn't require lengthy paperwork.	Complex application process, with extensive required documentation
Speedy access to funding	Once approved, funding could be available in just a couple of days.	30-60 days (depending on approval process)
Flexible pricing structure	Payments are a fixed percentage of card sales— amounts adjust automatically, ensuring maximum flexibility.	One set, fixed monthly
One fixed fee	The agreed price stays the same, no matter how long payment takes.	
Stress-free, simple payments	Every card transaction automatically contributes to payment—effortless and stressfree.	
Funding experts	83% of customers recommend Liberis and they are rated 4.8 stars on Trustpilot with 43,000+ businesses funded since 2007.	

Use of Funds

Elavon Quick Capital can be used for any purpose. However, some of the more common ways to use funding are:

-  Purchasing inventory
-  Upgrading business equipment
-  Refurbishing or expanding business premises
-  Covering cash flow during uncertain or slower times

Pricing

Instead of an interest rate, Liberis charges one fixed fee. This is a percentage of the total advance.

- Shorter payment terms typically have a lower cost.

Pricing Example

Advance Total	\$10,000
Fixed Fee	\$1,800 (18%)
Total payment owed to Liberis	\$11,800
Split percentage	20% (of daily card transactions)
If the average monthly card transactions are \$8,000, it will take approximately 7 months to pay for the advance.	

Merchant Eligibility

To be eligible, it's critical that they meet the following criteria:

- Have at least 4 months' processing history
- Processing a minimum of \$1,000 over at least 10 card transactions monthly
- Processing in 1 of the last 2 months
- Accept credit/debit card payments
- Are not in one of the following excluded industries:

Estate Agents	Financial Services	Government Services
Schools Social Services	NFP Companies	Insurance and Sales Underwriting
Travel Agents		

Customer Snapshots

1. Growth & Expansion

Two Magpies Bakery - Bakery & Cafe

Challenge: Lack of funding to grow and expand the business.

Solution: Received \$320k in funding

Results: Purchase of new cafe location, and consolidation of two production units into one larger, more efficient facility to meet increased demand.

2. Stock Purchase & Navigating Seasonal Demand

Boba Skellington - Retailer

Challenge: Seasonal changes in demand meant cash flow was low when they needed to stock up.

Solution: Received \$21k in funding

Results: Purchase of stock to meet future demand, and 20% increase in monthly revenues.

1. “How is the percentage of revenue for payment determined? Isn’t it going to be too high?”

“The percentage is tailored to your revenue and business needs, not a one-size-fits-all approach. It’s based on factors like your revenue history, funding amount, and growth potential. Payments scale with your revenue—if you have a slower month, your payment decreases automatically.

2. “What if my revenue drops significantly? Will my payments increase or stay the same?”

“If your revenue drops, your payments will adjust automatically. Elavon Quick Capital adapts to your business performance, so you won’t be burdened with fixed payments during slow periods. This ensures payments always align with your cash flow.”

3. “I’ve heard this can be more expensive than traditional loans. Why should I choose this over a bank loan?”

“It’s true that Elavon Quick Capital can appear more expensive in terms of the total payment, but it offers significant advantages over traditional loans: no fixed monthly payments, no collateral, and a fast, hassle-free application process. Ultimately, it’s about finding the right solution for your business’s needs—if you’re looking for fast, flexible financing without the hassle of rigid loan terms, Elavon Quick Capital can be a more effective choice.”

4. “What happens if I miss a payment or can’t make a payment?”

“Payments adjust automatically based on revenue, so there’s no risk of missing a fixed installment. If you’re facing financial difficulties, we’ll work with you to adjust your payment structure and provide support.”

5. “I’ve been burned by other lenders in the past. How can I trust you?”

“We understand that funding can be challenging, and many business owners have felt let down by lenders. That’s why we prioritize transparency, fairness, and long-term partnerships. We explain everything upfront, answer your questions, and ensure you feel confident in your decision.”

6. “How do I know if this is the right option for my business?”

“Elavon Quick Capital is ideal for business growth, cash flow management, or one-time expenses like equipment or marketing. A consultation can help determine if it’s the best fit for your needs.

7. “What if my business is new and doesn’t have a long revenue history?”

“We may still be able to help. While revenue history is a key factor in determining the funding amount and payment percentage, we also take other factors into account. We recommend scheduling a consultation session to determine how we can support your business.”

8. “What if I have multiple locations—how does this work?”

“If you operate multiple locations, we can tailor a financing solution that reflects the overall revenue of the group. The funding amount would be based on the aggregate monthly revenue across all locations, and payments would be tied to the total revenue, giving you flexibility across the business. Elavon Quick Capital can scale with your business and adapt to the financial needs of each location.”

9. “What is the interest rate?”

“Elavon Quick Capital does not have an interest rate because there is no fixed term. Instead, there’s one fixed fee that doesn’t change, even if you need more time to pay.”
